68Z was a small birth weight bull that grew into a power house with all kinds of depth of rib and lots of middle. This moderate framed bull will work great on not just Angus cows but will be a great cross for those exotic breeds.

78Z is from one of those well sought after Barney/Babe females that produces progeny who speak for themselves. Blake's Red Angus purchased her when she was carrying a full brother to 78Z. They showed him this past summer and fall with great success. Another one of her sons made a great herd sire for JAS Red Angus. Look for performance in this deep ribbed prospective herd sire.

Kuntz Farms Heifers

I was asked by both my purebred and commercial customers to put some heifers in the sale. So with great deliberation, for those herd building enthusiasts and 4H members looking for this years' project, I am offering a select group of four purebred open heifers from our exciting new herd sire Staunch 64Y and the well proven Mystified 16X. For those not wanting papers I am offering two Mystified 16X open heifers, but still showing you their pedigree. This is your opportunity for proven cow families crossed with some of the newest genetics in Mystified and Staunch.

This heifer comes from the time tested Miss Pathy family that was a part of the foundation herd for Kuntz Farms and is still producing the progeny we are all looking for. Her dam is a moderate sized cow with a great udder and all kinds of milk. 6A was shown competitively and admired at the shows last fall. She exhibits tremendous depth and spring of rib with an angular front end. A definite show/brood cow prospect.
